PROFESSIONAL SUMMARY

Software QA Engineer with 2+ years of experience in manual and automation testing of web and mobile applications, including 1.5+ years of freelance work across HR, healthcare, e-commerce, AI, travel, and event-management platforms. Skilled in functional, regression, smoke, integration, and exploratory testing, API testing with Postman, and defect tracking in Jira. Hands-on with Selenium WebDriver, Playwright, and Java for automation. Experienced in Agile/Scrum, SDLC, STLC, and cross-functional collaboration to deliver high-quality, reliable releases.

CORE EXPERTISE

Testing Types: Manual Testing, Functional, Regression, Smoke, Sanity, Exploratory, Integration, UI, UAT, API Testing, Database Testing, Cross-Browser Testing

QA Practices: Test Case Design, Test Planning, Defect Tracking, Defect Triage, Release Sign-Off

Methodologies: Agile/Scrum, SDLC, STLC, CI/CD, BDD

TECHNICAL SKILLS

Automation: Selenium WebDriver, Playwright, TestNG, Cucumber, Page Object Model, Data-Driven Testing

Programming: Java, Python, OOP Concepts

API & Database: REST API Testing, Postman, JSON, SQL

Tools: Jira, Azure DevOps, TestRail, Git, GitHub, Maven, Jenkins

Platforms: Web Applications, Android, iOS

SOFT SKILLS

Communication, Client Collaboration, Analytical Thinking, Attention to Detail, Problem-Solving, Time Management, Adaptability, Teamwork

WORK EXPERIENCE

Software QA Engineer | SANKARAA Tec **Dec 2024 – Present**

- Lead manual testing for web and mobile apps, translating business requirements into structured test plans and scenarios.
- Own test coverage across functional, regression, smoke, integration, and exploratory cycles for multiple concurrent releases.
- Conduct API testing via Postman, validating REST endpoints, payloads, and status codes.
- Drive defect triage in Jira with developers and give release sign-off through UAT.
- Key Project: Oracle NetSuite (web & mobile) – validated enterprise ERP/CRM business workflows.

Freelance Software QA Engineer | Self-Employed **Mar 2025 – Present**

- Independently manage QA for multiple client projects in parallel, owning test strategy and execution end-to-end.
- Build automated test suites using Selenium WebDriver (Java) and Playwright, tailored to each client's stack.
- Perform cross-browser and cross-device testing; communicate directly with clients on defects and fixes.

Associate Software QA Engineer | Enhanzer Pvt Ltd **Apr 2023 – Nov 2024**

- Designed automation frameworks from the ground up using Selenium WebDriver, Java, and Page Object Model.
- Automated smoke and regression suites for critical user journeys, cutting manual regression effort per release.
- Validated REST APIs via Postman alongside UI testing for end-to-end data integrity.
- Key Project: Ezuite ERP (web & mobile) – automated core enterprise workflow testing.

QA Engineer Intern | Enhanzer Pvt Ltd **Sep 2022 – Mar 2023**

- Supported manual testing of web and mobile apps under senior QA guidance; learned SDLC, STLC, and defect lifecycle.
- Executed assigned test cases and documented results and defects clearly for team review.

FREELANCE PROJECTS

- **HR Management System (Web Application)** – Functional, regression, and API testing of employee data, leave/attendance, and role-based access.
- **Gem Mobile App (Mobile Application)** – Manual and cross-device testing across Android and iOS for functionality, UI consistency, and performance.
- **Stock Management System (Web Application)** – Tested inventory tracking, stock-in/stock-out workflows, and inventory API endpoints via Postman.
- **DreamFolio AI (AI-Powered Web Application)** – Validated AI-generated resume output accuracy, edge cases, and the core generation flow.
- **Event Management System (Web Application)** – Validated event creation, booking, and scheduling workflows; regression tested booking and notifications.
- **Dog Skin Disease Diagnosis & Pharmacy (Web Application)** – Functional, regression, and API testing of ML-based dog skin disease diagnosis, medication recommendations, image uploads, and online pharmacy ordering.
- **Tour Global Hub (Web Application)** – Functional, regression, smoke, UI, and API testing of a travel and tourism application, covering user workflows, booking-related features, form validations, and responsive web functionality.
- **AeroLink Shuttle: Student Ride (Web Application)** – Functional, regression, UI, and API testing of student airport shuttle booking, including passenger details, pickup/drop-off, date selection, luggage options, university email verification, booking confirmation, and online payment integration.

EDUCATION

BSc (Hons) in Computing – Wrexham Glyndŵr University, UK **2025 – 2026**
Higher Diploma in Information Technology – University of Moratuwa **2018 – 2022**
Diploma in Information Technology – Wayamba University of Sri Lanka **2018**

CERTIFICATIONS

- Software Testing Foundations: Test Techniques – LinkedIn Learning
- Selenium WebDriver & Java – Udemy
- Continuous Delivery and Release Pipelines with Azure DevOps – University of Minnesota
- Java Programming and Software Engineering Fundamentals – Duke University
